

January 3rd, 2020

Valued Business Partner,

Due to increasingly stringent regulatory requirements, at this time we have been forced to discontinue supply of our IHC control slide product line to your geography.

These products can typically be identified with the following alpha-numeric sequence designation example: "123S"

If the ability to re-supply your geography arises, we will contact you.

We apologize for any inconvenience this causes you and/or your customers. If you have any questions, please let us know.

Best regards,

Isaac Milos
